Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II - United Kingdom (UK) SAFETY DATA SHEET

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name	Castrol Vecton 15W-40 CJ-4
Product code	468487-BE02
SDS no.	468487
Product type	Liquid.
1.2 Relevant identified us	es of the substance or mixture and uses advised against
Use of the substance/	Automotive engine crankcase lubricant.
mixture	For specific application advice see appropriate Technical Data Sheet or consult our company representative.
1.3 Details of the supplier	of the safety data sheet
Supplier	Castrol (UK) Limited
	PO Box 354,
	Chertsey Road, Sunbury On Thames,
	Middlesex.
	TW16 9AW
	Orders/Enquiries: 0845 6008125
	Technical Enquiries: 0845 082 1719
	BP (Ireland) Ireland Orders/Enquiries: 1850 930 3942 Ireland Technical Enquiries: 1800 509 353
E-mail address	MSDSadvice@bp.com
1.4 Emergency telephone	number
EMERGENCY	Carechem: +44 (0) 1235 239 670 (24/7)
TELEPHONE NUMBER	
SECTION 2: Hazard	ds identification
2.1 Classification of the su	ibstance or mixture
Product definition	Mixture
Classification according Not classified.	to Regulation (EC) No. 1272/2008 [CLP/GHS]
Classification according	to Directive 1999/45/EC [DPD]
The product is not classifie	d as dangerous according to Directive 1999/45/EC and its amendments.
See sections 11 and 12 for	more detailed information on health effects and symptoms and environmental hazards.
2.2 Label elements	
Signal word	No signal word.
Hazard statements	No known significant effects or critical hazards.
Precautionary statements	
Prevention	- Not applicable.
Response	Not applicable.
Storage	Not applicable.
Disposal	Not applicable.
Supplemental label elements	Contains Benzenesulfonic acid, mono-C16-24-alkyl derivs., calcium salts. May produce an allergic reaction.
Special packaging requir	ements
Product name Castrol Vect	on 15W-40 CJ-4 <b>Product code</b> 468487-BE02 <b>Page: 1/10</b>

## **SECTION 2: Hazards identification**

Containers to be fitted with child-resistant fastenings	Not applicable.
Tactile warning of danger	Not applicable.
2.3 Other hazards	
Other hazards which do not result in classification	Defatting to the skin. USED ENGINE OILS Used engine oil may contain hazardous components which have the potential to cause skin cancer. See Toxicological Information, section 11 of this Safety Data Sheet. Experimental data on one or more of the components has been used to determine all or part of the hazard classification of this product.

## **SECTION 3: Composition/information on ingredients**

Mixture

Highly refined base oil (IP 346 DMSO extract < 3%). Proprietary performance additives.

		, , , , , ,	Clas	sification	
Product/ingredient name	Identifiers	%	67/548/EEC	Regulation (EC) No. 1272/2008 [CLP]	Туре
Base oil - unspecified	Varies - See Key to abbreviations	≥10 - <25	Not classified.	Asp. Tox. 1, H304	[1] [2]
Phosphorodithioic acid, mixed O,O-bis(1, 3-dimethylbutyl and iso- Pr) esters, zinc salts	REACH #: 01-2119493626-26 EC: 283-392-8 CAS: 84605-29-8	≥1 - <3	Xi; R41, R38 N; R51/53	Skin Irrit. 2, H315 Eye Dam. 1, H318 Aquatic Chronic 2, H411	[1]

See Section 16 for the full text of the R-phrases declared above.

#### See Section 16 for the full text of the H statements declared above.

<u>Type</u>

Substance/mixture

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms appear.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

#### 4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician Treatment should in general be symptomatic and directed to relieving any effects.

Product name	Castrol Vecton 15W-40 CJ-4		Product code 46848	37-BE02	Page: 2/10
Version 2.01	Date of issue 4 March 2016	Format	United Kingdom (UK) (United Kingdom)	Language	ENGLISH

## **SECTION 5: Firefighting measures**

	5
5.1 Extinguishing media	
Suitable extinguishing media	In case of fire, use foam, dry chemical or carbon dioxide extinguisher or spray.
Unsuitable extinguishing media	Do not use water jet.
5.2 Special hazards arising fro	m the substance or mixture
Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous combustion	Combustion products may include the following:
products	carbon oxides (CO, CO <sub>2</sub> ) (carbon monoxide, carbon dioxide)
5.3 Advice for firefighters	
Special precautions for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

#### **SECTION 6: Accidental release measures**

6.1 Personal precautions, prote	ctive equipment and emergency procedures
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Put on appropriate personal protective equipment.
For emergency responders	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for co	ntainment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions. See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

# 7.1 Precautions for safe handling

Protective measures	Put on appropriate personal protective equipment.
Advice on general	Eating, drinking and smoking should be prohibited in areas where this material is handled,
occupational hygiene	stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional
	information on hygiene measures.

## **SECTION 7: Handling and storage**

SECTION /: Handling		
7.2 Conditions for safe storage, including any incompatibilities	Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store and use only in equipment/ containers designed for use with this product. Do not store in unlabelled containers.	
Not suitable	Prolonged exposure to elevated temperature.	
7.3 Specific end use(s)		
Recommendations	See section 1.2 and Exposure scenarios in annex, if applicable.	
SECTION 8: Exposur	e controls/personal protection	
8.1 Control parameters		
Occupational exposure limit	<u>'S</u>	
Product/ingred	ient name Exposure limit values	
Base oil - unspecified	ACGIH TLV (United States). TWA: 5 mg/m <sup>3</sup> 8 hours. Issued/Revised: 11/2009 Form: Inhalable fraction	
vapour or dust produced. The guidance only.	ain components may be shown in this section, other components may be present in any mist, erefore, the specific OELs may not be applicable to the product as a whole and are provided for	
Recommended monitoring procedures	If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.	
Derived No Effect Level No DNELs/DMELs available		
Predicted No Effect Concent No PNECs available	<u>tration</u>	
8.2 Exposure controls		
Appropriate engineering controls	<ul> <li>Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits.</li> <li>All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained.</li> <li>Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards. The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.</li> </ul>	
Individual protection measu	<u>res</u>	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.	
Respiratory protection	Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure. In case of insufficient ventilation, wear suitable respiratory equipment. The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.	
Eye/face protection Skin protection	Safety glasses with side shields.	
Product name Castrol Vector	15W-40 CJ-4         Product code         468487-BE02         Page: 4/10

## SECTION 8: Exposure controls/personal protection

Hand protection	General Information:					
	Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. Most gloves provide protection for only a limited time before they must be discarded and replaced (even the best chemically resistant gloves will break down after repeated chemical exposures).					
	Gloves should be chosen in consultation with the supplier / manufacturer and taking account of a full assessment of the working conditions. Recommended: Nitrile gloves. Breakthrough time:					
	Continuous contact:					
	Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained. If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.					
	Short-term / splash protection:					
	Recommended breakthrough times as above. It is recognised that for short-term, transient exposures, gloves with shorter breakthrough tin may commonly be used. Therefore, appropriate maintenance and replacement regimes mus be determined and rigorously followed.					
	Glove Thickness:					
	For general applications, we recommend gloves with a thickness typically greater than 0.35					
	It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependen on the exact composition of the glove material. Therefore, glove selection should also be ba on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into acco to ensure selection of the most appropriate glove for the task.					
	Note: Depending on the activity being conducted, gloves of varying thickness may be require for specific tasks. For example:					
	• Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection and would normally be just for single use applications, then disposed of.					
	• Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as we as a chemical) risk i.e. where there is abrasion or puncture potential.					
Skin and body	Use of protective clothing is good industrial practice. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling thi product.					
	Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regubasis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.

## **SECTION 8: Exposure controls/personal protection**

•	• •
<u>Refer to standards:</u>	Respiratory protection: EN 529 Gloves: EN 420, EN 374 Eye protection: EN 166
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties **Appearance Physical state** Liquid. Colour Amber. [Light] Odour Not available. **Odour threshold** Not available. pH Not available. Melting point/freezing point Not available. Initial boiling point and boiling Not available. range -42 °C **Pour point Flash point** Open cup: 226°C (438.8°F) [Cleveland.] [Product does not sustain combustion.] **Evaporation rate** Not available. Flammability (solid, gas) Not available. Upper/lower flammability or Not available. explosive limits Not available. Vapour pressure Not available. Vapour density **Relative density** Not available. 878 kg/m3 (0.878 g/cm3) at 15°C Density Solubility(ies) insoluble in water. Partition coefficient: n-octanol/ Not available. water Not available. Auto-ignition temperature **Decomposition temperature** Not available. Kinematic: 118.2 mm<sup>2</sup>/s (118.2 cSt) at 40°C Viscosity Kinematic: 15.5 mm<sup>2</sup>/s (15.5 cSt) at 100°C **Explosive properties** Not available. **Oxidising properties** Not available.

#### 9.2 Other information

Г

No additional information.

<b>SECTION 10: Stability</b>	/ and reactivity			
10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.			
10.2 Chemical stability	The product is stable.			
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.			
10.4 Conditions to avoid	Avoid all possible sources of ignition (spark or flame).			
10.5 Incompatible materials	Reactive or incompatible with the following materials: oxidising materials.			
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## **SECTION 11: Toxicological information**

## 11.1 Information on toxicological effects

	Route	ATE value	
Not available.			
Information on the likely routes of exposure	Routes of entry anticipated: Dermal, Inhalation	n.	
Potential acute health effect	<u>ts</u>		
Inhalation	Vapour inhalation under ambient conditions is pressure.	s not normally a problem due to low vapour	
Ingestion	No known significant effects or critical hazard	ls.	
Skin contact	Defatting to the skin. May cause skin dryness	s and irritation.	
Eye contact	Not classified as an eye irritant. Based on dat	a available for this or related materials.	
Symptoms related to the ph	ysical, chemical and toxicological characterist	<u>tics</u>	
Inhalation	No specific data.		
Ingestion	No specific data.		
Skin contact	Adverse symptoms may include the following: irritation dryness cracking	:	
Eye contact	No specific data.		
Delayed and immediate effe	cts and also chronic effects from short and lo	<u>ng term exposure</u>	
Inhalation	Overexposure to the inhalation of airborne dro respiratory tract.	oplets or aerosols may cause irritation of the	
Ingestion	Ingestion of large quantities may cause nause	ea and diarrhoea.	
Skin contact	Prolonged or repeated contact can defat the s	skin and lead to irritation and/or dermatitis.	
Eye contact	Potential risk of transient stinging or redness i	if accidental eye contact occurs.	
Potential chronic health effe	ects		
General	engine oils during use. Used engine oil may o	ation of internal combustion engines contaminate contain hazardous components which have the rolonged contact with all types and makes of used igh standard of personal hygiene maintained.	
Carcinogenicity	No known significant effects or critical hazard	No known significant effects or critical hazards.	
Mutagenicity	No known significant effects or critical hazard	No known significant effects or critical hazards.	
Developmental effects	No known significant effects or critical hazard	s.	
Fertility effects No known significant effects or critical hazards.		ls.	

## **SECTION 12: Ecological information**

12.1 Toxicity

**Environmental hazards** 

Not classified as dangerous

#### 12.2 Persistence and degradability

Expected to be biodegradable.

#### 12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

#### 12.4 Mobility in soil Soil/water partition coefficient (Koc)

Mobility

n Not available.

Spillages may penetrate the soil causing ground water contamination.

# 12.5 Results of PBT and vPvB assessment PBT Not applicable.

vPvB	Not applicable.

Product name	Castrol Vecton 15W-40 CJ-4
Version 2.01	Date of issue 4 March 2016

#### ✓ Indicates information that has changed from previously issued version.

#### Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
